## NCB SPA PERFORMANCE RANGE

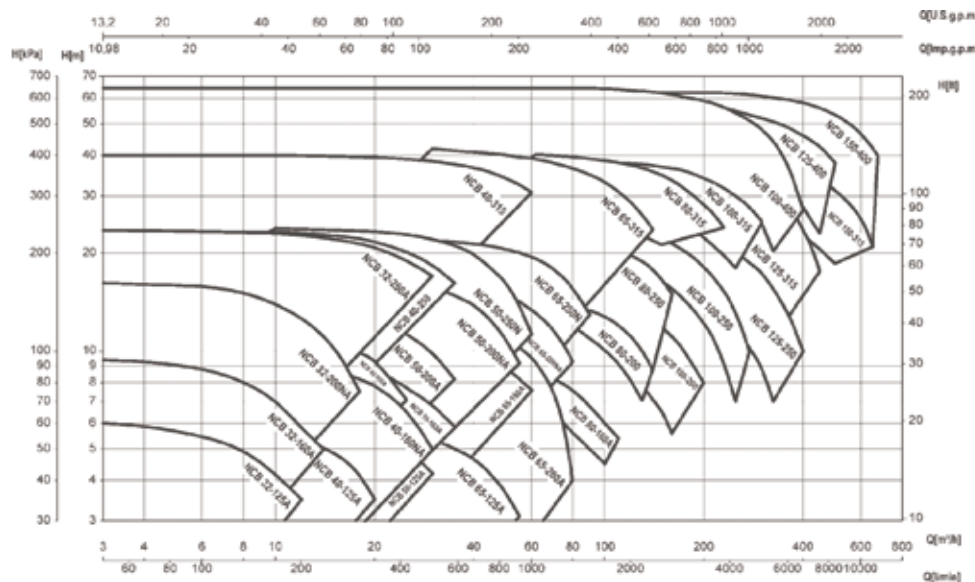

### NCB SPA FAMILY 960 RPM

### NCB SPA FAMILY 2900 RPM

### NCB SPA FAMILY 1450 RPM

SAER Elettropompe SPA are renowned manufacturers of a wide range of high quality engineered pumps. The facilities located in Guastalla Italy feature design and testing departments using the latest computer design and simulation software. Complete testing facilities and high volume CNC and robot manufacturing lines.

In conjunction with SAER Australia, pumps complying to API 610 latest edition are now available.

By utilizing the technology from Guastalla, and Australia's well known ability to manufacture high quality product in low volume we can now offer these cutting edge pumps in remarkably short delivery times.

The pump range now includes OH1, OH2, deep well submersible and vertical turbine pumps.
